

SAVE YOURSELF!

A Climate Justice Documentary

SUMMARY

Told through the vision and voice of a hopeful future, this film shines a light on communities in crisis and how we're reclaiming our spaces, with a scornful glance at billionaire bunkers—while the rest of us fight for a bright future.

PRODUCTION TEAM

Effie T. Brown

Longtime advocate and voice for diversity and inclusion in the film industry, Effie is CEO and majority owner of Gamechanger Films.

Bryce Cracknell

Award-winning social impact producer, Bryce is the founder and executive editor of the new, independent environmental justice media organization, The Margin.

Maria Collette Sundeen

Award-winning Latina filmmaker and writer, as a former journalist she has covered a range of stories and issues for CNN, PBS, UCTV, and as Associate Producer for the launch of C|NET-TV.

Why our story is different

Through witnessing how changes in climate affect the most vulnerable, this film is a unique exploration into how corporations, communities, climate activists, and the one percent are preparing—or not preparing—for a radically different earth, presenting a story that will educate, amplify, empower and activate even the most cynical of us.

LOCATIONS

Carbon capture and toxic fossil fuels (Texas)

Mining & Indigenous land rights (Nevada)

Water & lithium issues (California)

Reclaiming the land and communities (North Carolina)

ZERO 2050

Starting with our ticking clock that demands carbon production reach net zero by 2050, we'll look at incentives at play.

ISSUES

Through hearing from Native, Black and Latine communities directly affected by negligence and climate change, the film will dig deeper into what's happening and why.

EQUITABLE SOLUTIONS

This is where we unpack and explore the complex solutions to these issues, wondering if the compromise solutions are real solutions at all? POC have ideas!

RECLAIMING EARTH

Micro-communities are driving self-sufficient climate pathways, led by BIPOC community leaders & climate influencers.

THE FUTURE: Hope With Teeth

Sustainable cities of the future will be bigger, greener, and more intertwined with technology. Some cities are already there. But we need diverse voices to ensure a truly multicultural vision. The hope is to present a viable, intentional and just future for all.
